CANADIAN ENERGY POWERING GLOBAL OPPORTUNITY

North America's leading B2B energy exhibition and conference bringing technology, innovation and the transfer of knowledge under one roof June 10-12, 2025.

Ranked as the fourth top energy producer in the world, Canada has the opportunity to showcase its expertise in energy production, storage, technology and innovation.

As global energy markets are changing amidst geopolitical shifts and increasing energy demand, government leaders and industry executives are prioritizing long-term sustainability and investment strategies to help accelerate a low-carbon economy.

Hosting five halls of exhibition space, two conferences and an awards gala, Global Energy Show Canada fosters innovation, leadership and synergy between all energy verticals within three fully-packed days.

Hosted over three days in Calgary, the event offers participants the opportunity to connect with 500+ exhibitors, 350+ expert speakers and 30,000 qualified attendees under one roof.

Canada Ranked:

4th largest oil producer

5th largest natural gas producer

4th largest hydroelectricity producer

6th largest generator of nuclear power

Top 10
hydrogen producer

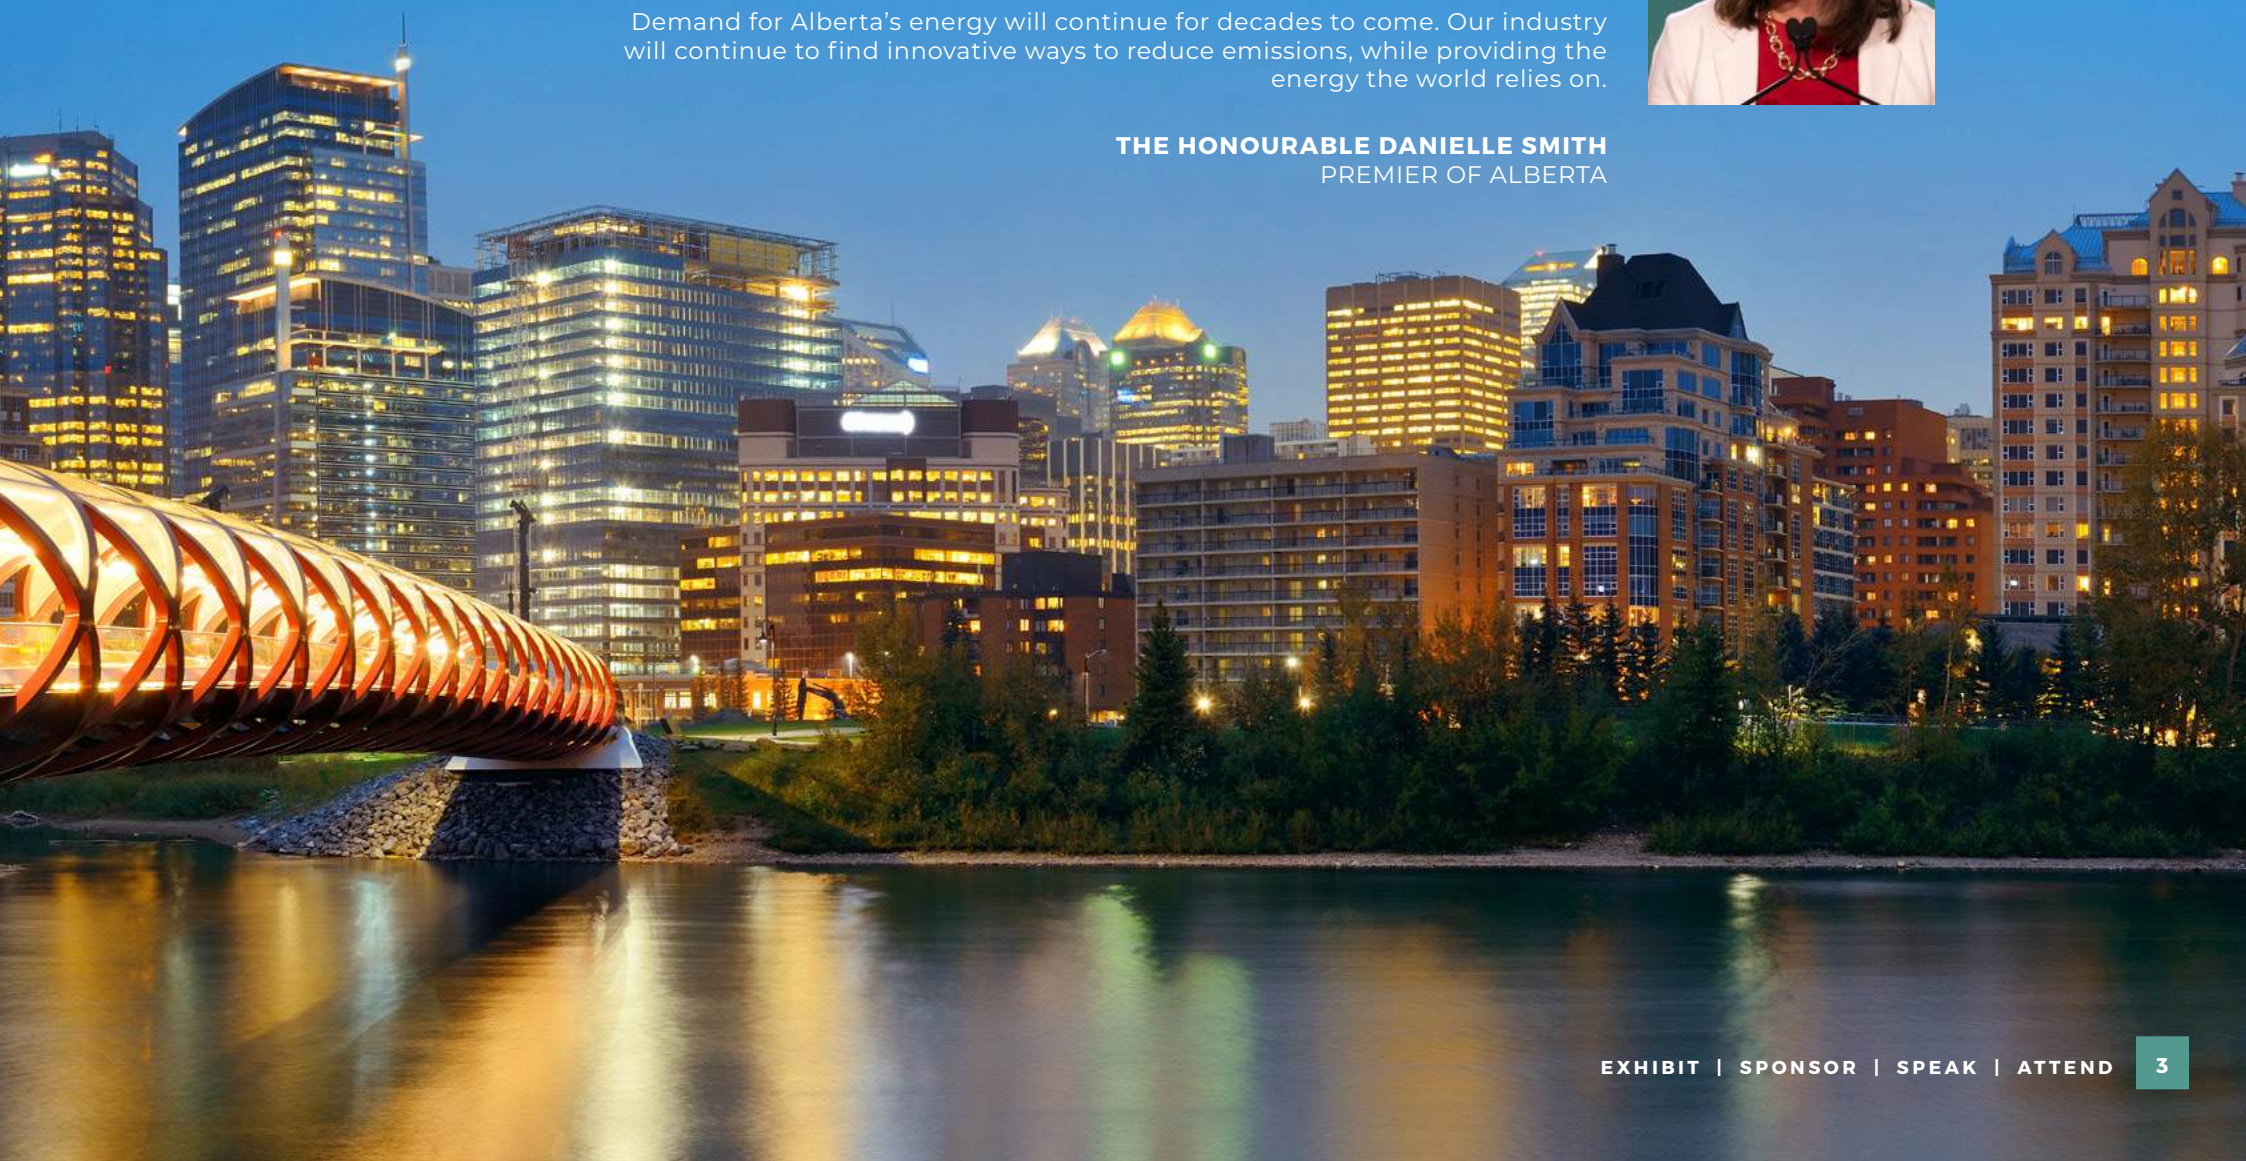

“

Things are continually looking up for Alberta's natural resource and energy sector and there is optimism to spare. That's obvious when I see everyone here at the Global Energy Show. We continue to see visitors from all over the world come to Alberta from executives to engineers, buyers and investors. They are here to gather the information and plan for the safe, sustainable, long-term production and transportation of energy.

Demand for Alberta's energy will continue for decades to come. Our industry will continue to find innovative ways to reduce emissions, while providing the energy the world relies on.

EXECUTIVE CONFERENCE

Tuesday, June 10 - Thursday, June 12

In a world where polarizing politics, energy security and climate responsibilities dominate global headlines, the Global Energy Show Executive Conference aims to cut through the noise and deliver a critical conversation and informed debate on the future of energy in Canada. Recognizing that no single source of energy can meet the increased global energy demand, the Executive Conference is where Canada demonstrates its vision and leadership by bringing the entire energy ecosystem together for a national energy dialogue, ensuring the public, private sector, and government are aligned on Canada's path forward to meet global demand challenges with real-world solutions. The Executive Conference will gather industry leaders, government representatives and major global players for a national dialogue that is critical to developing practical frameworks, policy, actions and guidelines to shape "Canada's Energy Mandate to 2030".

KEY HIGHLIGHTS INCLUDE:

Thought-leaders Across the Energy Spectrum

With the entire energy ecosystem present, expect high-impact discussions that tackle the pressing issues of Canada's energy mandate to 2030 covering sustainability, innovation, and economic transition.

National Dialogue

Hosted in the energy capital of Canada, the conference will convene leaders, change-makers and innovators from coast to coast to harness and drive the conversation on how Canada can realize the national energy opportunity.

Thematic Focus

Under the theme "Canada's Energy Mandate to 2030," this event will dive deep into the challenges and opportunities Canada faces in reaching its energy goals, with expert insights into regulatory frameworks, investment trends, and cutting-edge technologies that will define the next decade.

LEADERSHIP ROUNDTABLES

The energy industry is evolving and adapting to geopolitical challenges and ongoing energy supply issues, all while prioritizing sustainable energy solutions. The need for a clear strategy towards low-carbon solutions and investment in clean technologies continues to be a priority, even as urgent energy security concerns persist. Additionally, finance and investment, Artificial Intelligence (AI), technology, and talent are critical enablers that will drive progress and sustainable growth in the energy sector.

This year's exclusive Leadership Roundtables will provide a platform for in-depth discussions, insights, and networking opportunities focused on the most pressing challenges in the energy sector. Key stakeholders - including policymakers and industry leaders, will gather to explore essential trends and opportunities that can drive the transition to a sustainable energy future.

Canada: Shaping a Pragmatic and Realistic Energy Future

Engaging Indigenous Leaders in a Collaborative and Strategic Dialogue on Energy Priorities

Canada and United States: Harnessing Collective Capacity to Transform North America into a Global Leader in Energy Innovation

The Role of Hydrogen in Canada's Energy Future and Lessons Learned from the United States Inflation Reduction Act (IRA)

Financing Canada's Energy Transition to 2030

Canada's Electricity Future

Sustainability Increasing Production in the Canadian Oil Sands

The Role of AI in the Energy Transition: Accelerating the Integration of Low Carbon Energy Solutions

Canada's Carbon Capture, Utilization and Storage (CCUS) Ambitions

The Future of Nuclear Energy in Canada: Small Modular Reactors (SMRs)

Capitalizing on Canada's LNG Opportunity in an Evolving Canadian Political Climate

Innovations in Energy Efficiency in Canada: What's Working and What Isn't

TECHNICAL CONFERENCE

Tuesday, June 10 - Thursday, June 12

The Global Energy Show Canada Technical Conference brings together technical experts from around the world to present and discuss the latest technologies, processes, and innovations to help companies increase efficiencies, save costs, and achieve net zero.

Delegates will hear from over 100 speakers providing access to a wealth of critical industry-leading knowledge and networking. The conference format includes individual technical presentations, panel discussions, roundtables, and poster sessions on the exhibition floor.

Technical presentations are selected based on a peer reviewed process by our prestigious Global Energy Show Canada Technical Committee who represent the top technical and project-based organizations from around the world.

The Clean Technology & Environment Theatre will cover topics and technical innovations to reduce environmental impacts and increase the efficiency of all forms of energy production. This theatre will cover topics including clean technology and environmental management, methane emissions and CCUS.

The Transformative Energy Theatre will cover topics and technical solutions covering other energy sources including hydrogen, nuclear and renewables such as solar, wind, geothermal and hydropower. This theatre will cover topics including hydrogen, renewables and sustainable electricity generation and grid modernization.

The Sustainable Oil & Gas Theatre will cover topics and technical solutions to assist oil and gas companies in reducing emissions, increasing efficiency and limiting the environmental impact of production. This theatre will cover topics including cleaner hydrocarbon production and enhanced oil recovery, reservoir engineering, drilling and completion along with field development and infrastructure.

WHY EXHIBIT AT THE GLOBAL ENERGY SHOW?

The Global Energy Show is the ideal platform for companies from across the entire energy landscape to showcase their expertise and services to investors and buyers looking to do business in the North American market.

With **30,000+ industry professionals** expected to attend over three days of industry innovation, knowledge exchange and networking, the exhibition provides companies the unique opportunity to maximize brand exposure to the right audience.

Showcase your products, services and solutions

Exhibiting at the Global Energy Show allows exhibitors the opportunity to sell their products, services and solutions to industry buyers and decision makers.

Solidify your business network

The Global Energy Show draws professionals with strong buying power and gives exhibitors the opportunity to meet with existing connections and potential leads involved in the energy mix.

Reach your target audience

With 9/10 attendees being a key influencer, decision maker or purchaser, exhibiting at Global Energy Show Canada delivers real value.

Access new markets

Connect with primary stakeholders from upcoming regions developing project plans, budget allocations, timelines and tap into opportunities to win contracts.

Enhance brand recognition

Global Energy Show Canada brings a unique opportunity to differentiate your brand from the competition and create a lasting impression on current and potential buyers.

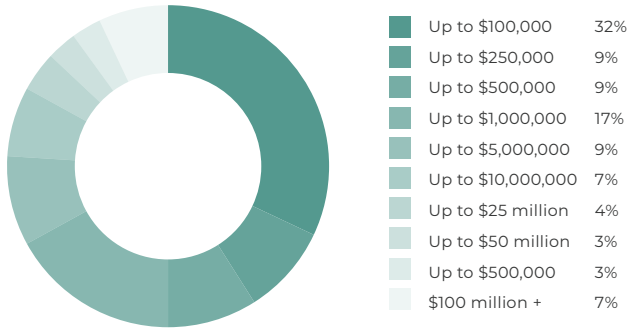

Get instant feedback

Engage with your target audience in a short timeframe, explore new ideas, gain first-hand product feedback and understand the trends shaping the future of energy.

FEATURED ZONES

Hydrogen

Delve into the transformative potential of hydrogen as a clean energy source. The Hydrogen Zone highlights pioneering projects and technologies in hydrogen production, storage, and utilization. Learn from experts about the role of hydrogen in achieving net-zero emissions and its applications across various industries.

Nuclear

Discover the advancements in nuclear energy that are driving the future of clean power generation. The Nuclear Zone features state-of-the-art nuclear technologies, safety innovations, and sustainable practices. Engage with leading professionals to understand how nuclear energy can play a pivotal role in meeting global energy demands while minimizing environmental impact.

Electrification & Energy Storage

Uncover the latest developments in electrification and energy storage solutions that are impacting the energy landscape. This zone presents cutting-edge technologies in battery storage, electric vehicles, and grid modernization. Connect with innovators and explore how these advancements can enhance energy efficiency and reliability.

Digital & Automation

Step into the future of digital transformation and automation in the energy sector. The Digital & Automation Zone showcases the integration of AI, IoT, and advanced analytics in optimizing operations and improving decision-making. Discover how digital solutions are driving efficiency, safety, and sustainability in energy management.

Oilfield Services & Technology

Experience the forefront of oilfield services and technology innovations. This zone highlights the latest advancements in drilling, exploration, and production technologies. Engage with industry experts to learn about new tools and techniques that are enhancing operational efficiency and reducing environmental impact in the oil and gas sector.

PARTICIPATING COMPANIES INCLUDE

EXHIBITION OPPORTUNITIES

INDOOR HARDWALL EXHIBITION PACKAGE

A ready-made hardwall shell scheme stand so you can turn up with your products, services and brochures. Additional features and customization can also be done through our official contractor, Goodkey Show Services. Includes floor space, standard grey booth carpet, hardwall shell scheme, customizable counter, two (2) stools, name board, daily janitorial, one (1) 1500-watt electrical outlet, basic onsite materials handling to booth (up to 5000 lbs. per crate, except for specialty work), crate storage during the show, 24-hour roaming security, and unlimited client invitations to attend the exhibition.

Hardwall Shell Scheme starting at \$67.10/sq. ft

INDOOR EXHIBITION PACKAGE

A standard exhibition solution with Pipe & Drape so you can turn up with your products, services, and brochures. This offering includes floor space, standard grey booth carpet, a name board, daily janitorial, one (1) 1500-watt electrical outlet, basic onsite materials handling to booth (up to 5000 lbs. per crate, except for specialty work), crate storage during the show, 24-hour roaming security, and unlimited client invitations to attend the exhibition. Additional furniture can be ordered through our official contractor, Goodkey Show Services.

Standard pipe & drape booth starting at \$58.00/ sq. ft

OUTDOOR SPACE ONLY PACKAGE

An opportunity to activate in our Outdoor Zone includes prime ground space, basic onsite materials handling to the booth (up to 5000 lbs. per crate, except for specialty work), one (1) parking pass (good for move in/out days only), 24-hour roaming security, basic company listing on the official event website and unlimited client invitations to attend the exhibition.

Starting at \$13/sq.ft

FEATURES ON THE EXHIBITION FLOOR

EMISSIONS REDUCTION THEATRE

Led by Methane Emissions Leadership Alliance (MELA) this popular and exciting show feature showcases most complete source of data, technologies and solution providers that monitor, measure, and reduce methane emissions.

FUTURE FORWARD NEXT GEN THEATRE

Find out about energy jobs of the future that will provide solutions and innovations needed to hit our climate targets and affordable and accessible energy around the world.

NETWORKING & SPECIAL FEATURES

SITE TOURS

Join us for exclusive site tours where you will have the unique opportunity to visit an energy facility and gain hands-on experience with real-world energy operations. This immersive tour is designed to provide attendees with a comprehensive understanding of the latest technologies and processes driving the energy sector.

AFTER PARTY

Join us on Wednesday, June 12 for an exciting concert experience where visitors can let loose in a casual setting. Organized off-site of Global Energy Show Canada, guests can finish the busy day of exhibition and conference and head to a casual setting to network and strengthen relationships.

AWARDS GALA

The Global Energy Show Awards, now in its 10th year, shines a spotlight on excellence in the energy industry here in Canada and around the world. The Awards recognize and celebrate the accomplishments of leaders, innovators and trailblazers over the last 12 months who have been at the forefront of leadership, innovation, sustainable solutions and promoting the healthy advancement of the energy sector.

The 10th edition of the Global Energy Show Awards will take place on June 10, 2025, in Canada's energy capital, Calgary. Nominees and winners will be celebrated in an exciting evening gala filled with entertainment, a chef-driven multi-course dinner, and high-calibre networking.
